

## Important email should be verifiable.

Send as normal. Give the recipient a way to check.

### WHAT ES MAIL DOES

ES Mail adds an independent, inspectable record to important business email. The recipient can check that it was issued through your organisation's authorised ES Mail process and matches the evidence recorded by EviState.

DOCUMENT ID ES-MAIL-EXPLAINER-001

VERSION 1.0 | 22 AUGUST 2026

## ES Mail

### VERIFIABLE IMPORTANT EMAIL

You keep using your normal business email process. The recipient needs no new inbox or software, and inspection is free.

#### HOW ES MAIL WORKS

### From ordinary email to inspectable evidence

*The message is delivered as usual. The evidence remains available afterwards.*

#### WHAT THE RECIPIENT CAN CHECK

### A matching EviState record exists

- The authorised ES Mail process used to issue it
- When the communication was issued and recorded
- That the communication matches the recorded issue
- The evidence remains available for later inspection

#### WHERE IT MATTERS

### Important communications

- Payment or bank-detail changes
- Contracts, approvals and instructions
- Confidential or regulated notices
- High-volume customer communication

#### THE PARTICIPATION EFFECT

### One sender gives the recipient immediate verification.

When both parties use ES Mail, important exchanges become verifiable in both directions and build stronger evidence of the relationship.

#### IMPORTANT BOUNDARY

ES Mail supports evidence of issuance and accountability. It does not, by itself, prove that a named individual personally authored the message or that its contents are true, lawful, safe or authorised.

#### THE COVERING EMAIL IS LIVE

Select its ES Mail frank to inspect the EviState communication record.

#### ES STAMP - ISSUED
